SKILLS

Languages

JavaScript, TypeScript, Python, C, Bash, SQL

Frontend

React, Next.js, Vite, Svelte, React Native, Electron, Tailwind

Backend

Node.js, Fastify, Express, Koa, FastAPI; REST & GraphQL, JWT, async

Databases & ORMs

PostgreSQL, MySQL, MariaDB, MS SQL, SQLite, MongoDB; Drizzle, SQLAlchemy, Sequelize, Mongoose

ML & Data

NumPy, pandas, Matplotlib, OpenCV, scikit-learn, Jupyter

Automation & Scraping

Playwright, Selenium, Scrapy, BeautifulSoup4, selectolax, httpx, curl_cffi

Platforms

Shopify (Liquid, APIs), Strapi 5, Chrome Extensions (MV3)

Infra / DevOps

Docker, Coolify, Nginx, Cloudflare (R2, DNS), VPS, Turborepo/pnpm, Git, Linux

EDUCATION

B.Sc. Computer Science

Hebei University of Science and Technology
In progress

PROFILE

Self-taught full-stack developer fluent across the JavaScript/TypeScript and Python ecosystems. I design and ship complete products end to end — monorepo architectures, REST/GraphQL APIs, SQL & NoSQL data layers, modern React/Next.js frontends, and self-hosted VPS deployments. Specialized in large-scale web automation and scraping, and in building and customizing Shopify and Strapi platforms.

PROJECTS

MobiOrbit — Smartphone Database & Commerce Platform *Founder / Solo*

mobiorbit.com — own product, in active development

- Architecting a South-Asia smartphone intelligence and commerce platform with device specs, comparison and search, built ad-ready from day one.
- Built as a **pnpm + Turborepo monorepo**: a **Fastify 5** + TypeScript API (raw MongoDB driver, JWT), a **Next.js 15** public site (App Router, ISR), and a **Vite + React 19** admin with a custom, from-scratch component library.
- Built a Python **GSMarena scraper** plus a companion **mobiCrawl Chrome extension** (Manifest V3, Shadow DOM); media on **Cloudflare R2**.

MyCareerPathshala — Full-Stack Education Platform *Solo*

- Built a custom CMS by **forking and extending Strapi 5** (Yarn monorepo) exposing REST & GraphQL, plus a Next.js student frontend and a separate Next.js admin dashboard.
- **Drizzle ORM on PostgreSQL**; JWT (jose) + bcrypt auth with middleware-protected routes; transactional email via Resend.
- Deployed all three apps as Docker containers on a Hostinger VPS via **Coolify**, with Nginx, Cloudflare DNS and Let's Encrypt SSL — delivered solo.

Economed.co.uk — Shopify E-commerce Store *Freelance*

- Scraped and processed **70,000+ products** into an automated pipeline that cleans, normalizes and imports the full catalog.
- Built a complete Shopify store with **custom Liquid** theming, driving the product pipeline through the Shopify **Admin API (GraphQL)**.

EXPERIENCE

Freelance Full-Stack Developer *2020 — Present*

- Deliver end-to-end web apps for clients — frontend, REST/GraphQL APIs, database design, deployment and VPS self-hosting.
- Build and customize Shopify and Strapi platforms; design large-scale scraping/automation systems with anti-bot handling.
- Undergraduate thesis: deep-learning weld-pool penetration sensing via biprism stereo vision (DE-Net, stereo matching, 3D feature extraction).
